

WHAT IS CRYONICS

Cryonics (from the Greek word kryos, meaning "icy cold") is the process of preserving humans at extremely low temperatures after they can no longer be sustained by current medical technology. The goal is to pause the biological processes that lead to death. Cryopreservation serves as a bridge between the declaration of legal death and the possibility of future medical advancements.

NEURO

Cryopreservation of the brain, often within the intact head, is based on the premise that the brain is the core of personal identity. It assumes that, with sufficiently advanced medical technology, the rest of the body could theoretically be reconstructed around the preserved brain or head.

WHOLE BODY

Cryoprotective perfusion involves circulating cryoprotectant chemicals throughout the entire body, followed by cooling it to liquid nitrogen temperatures (-196 c) for long-term preservation.

MEMBERSHIP OVERVIEW

ALCOR: World Leader in Cryonics
A 501 (C)(3) NON-PROFIT Scientific Research Foundation

WWW.ALCOR.ORG

BECOMING AN ALCOR MEMBER

1 FILL OUT APPLICATION

Complete online application

2 SIGN AGREEMENTS

Sign Cryopreservation agreements
Pay application fee & first year
membership dues

Calculating age-based dues:
(Current Age) x (\$15) per year
\$60 per minor child under 18 years old
\$200 per 18 year old at sign up

3 PROVIDE FUNDING

Life Insurance
Prepayment

1. Basic Member:

- ✓ Support Alcor by paying annual dues
- ✓ locks in age to calculate membership dues

- ✓ Cryopreserve pets

2. Cryopreservation Member:

- ✓ Full legal and financial arrangements for cryopreservation
- ✓ Support Alcor by paying annual dues
- ✓ locks in age to calculate membership dues
- ✓ Cryopreserve pets

CRYOPRESERVATION COSTS

Whole Body Cost Breakdown

total \$220,000

Cryopreservation	\$60,000
Standby & Stabilization	\$25,000
Patient Care Trust (long term storage)	\$135,000

Neuro Cost Breakdown

total \$80,000

Cryopreservation	\$30,000
Standby & Stabilization	\$25,000
Patient Care Trust (long term storage)	\$25,000

** Add \$10,000 for members outside the*

U.S. & Canada

COMPREHENSIVE MEMBER STANDBY (CMS)

When a member is at end of life, Alcor sends a trained response team to their location to provide standby and begin cryonic procedure as soon as legal death is declared.

FUNDING OPTIONS

There are two approved options for cryopreservation: **Prepayment** and **Life Insurance**

LIFE INSURANCE REQUIREMENTS

Whole Life or Universal Index Life 
Term 25–30 years (Must be Convertible) 
A.M. Best rating of A- or higher – ambest.com 

Membership dues and cost of cryopreservation subject to change

PET CRYOPRESERVATION

***Pet Cryopreservation available for
all Alcor Members***

OPTIONS

Straight Freeze

- Most common choice for pets
- Pets are cooled to liquid nitrogen temp after arrival
- More affordable

Perfusion

- High-quality preservation
- Euthanasia & perfusion by veterinary surgeon (only offered at Alcor Scottsdale facility)
- Rapid brain cooling with cryoprotectant
- Must be scheduled in advance

Price Factors

 Size-Based Costs	larger pets cost more
 Storage	long term care and Patient Care Trust
 Perfusion	Additional cost for supplies, setup, & veterinary setup
